

rebLOUVRE

Aluminium Adjustable Louvre Systems

www.reblouvre.com / info@reblouvre.com / +27 31 705 5851

rebLOUVRE has developed a reputation in South Africa as a top-quality louvre system for both the commercial and residential markets.

The key to our popularity and growth has been our high standards of service and manufacturing, investment in people, state of the art technology and our regular research and development.

DOORS & WINDOWS

Designed to meet the needs of the local modern lifestyle. This contemporary design is durable, low maintenance and sophisticated.

Our locally designed and manufactured systems are constructed of rigid purpose made aluminium extruded sections. All hinges and rolling gear are fabricated ex-aluminium and powder coated. The bottom roller is fabricated from stainless steel. The system is located by means of a roller guide into the frame head and positively run on an extruded aluminium tee section track.

Concealed flush bolt mechanism secures the sashes into the head and cill to ensure that the system is "rattle free" when in the closed position. A double cylinder hook lock ensures that the system cannot be opened even if the flush bolt mechanisms are not secured.

All our louvre systems are manufactured from high grade aluminium alloy, provided in an exterior grade epoxy powder coated, in a variety of colours.

Commercial and domestic applications.

Elegant and practical

SOLAR CONTROL

Great eco credentials sell homes, win contracts and help the planet by reducing energy consumption.

SAVE ELECTRICITY

Reductions in annual cooling energy consumption of 5% to 15%*

*Depending on the amount and location of fenestration.

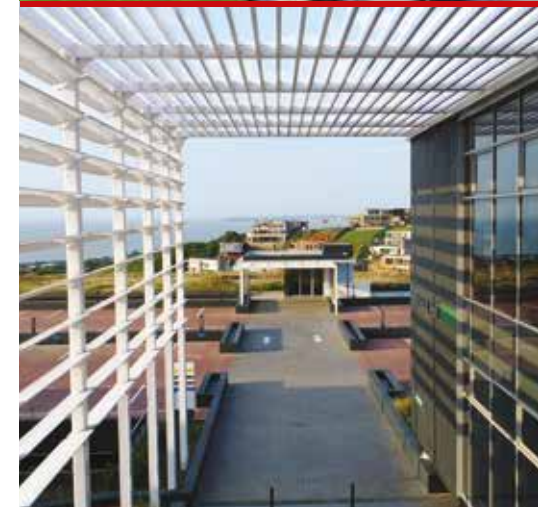

VISUAL COMFORT

Glare control and reduced contrast ratios enhance living spaces and improve productivity in working environments.

CURTAIN WALLS

The systems we use are designed to provide more efficient ways to fabricate, install and glaze products.

The design of this adaptable system increases quality control, cost control and productivity. Our Curtain Wall Service is offered as an added value to our Louvre systems.

rebLOUVRE is proud to provide our clients with a "one stop" solution for a range of aluminium louvre systems including the following services;

DESIGN: Our team is equipped with AutoCAD & 3D software, capable of handling projects from **conceptual to detailed workshop drawings** and most **custom application** requirements.

FULLY EQUIPPED FACTORY: We comfortably **handle high demand** and provide **high quality products** in an efficient turn around time. With state of the art CNC processing machinery to ensure accuracy of manufacturing and exceptional quality of finished products.

COSTING SOFTWARE: Bespoke estimating software ensures **accurate pricing** of our systems and **efficient responses** to enquiries. This software is also available to approved partners.

PROCESSING CAPACITY: By retaining high levels of stock for our standard systems (in standard colours), we are able to provide **extraordinary turn around times** for manufacturing.

Reasons why we deliver quality in design, manufacture and support:

- REBCON est. 1978
- REBLOUVRE est. 2010
- Locally engineered and manufactured products.
- Geared for fast turn-around times:
 - State of the art technology
 - High levels of standard stock
- Bespoke costing software:
 - Accurate, responsive quotes
 - We guarantee quotes within 24 hrs. (on standard requests)
 - Available to approved partners
- Latest CAD & 3D software for custom design application requests
