The modern trend of converging indoor and outdoor living spaces is ideally suited to our climate. It is with this desire in mind that **reblOUVRE** provides residents the ability to transition their own living spaces both visually and physically.

Our low maintenance, highly durable systems are available in a variety of colours and options to suit your particular architectural requirements; from sliding doors to stacking and folding doors or custom sized windows and window shutters.

All our louvre systems are manufactured with durability in mind, from high grade aluminium alloy, long-lasting epoxy powder coating and stainless steel ironmongery. Attention to detail is paramount. Our systems have the smoothest door movement in the industry and are rattle free. They also have integrated weather strips for draft reduction.

Your safety is also of importance to us. Extra heavy sections provide added strength and double cylinder hook locks ensure that the system cannot be opened even if the flush bolt mechanisms are not secured.
